

We're Building Digital Product High-Quality and Efficient Custom Development with Our Touch4IT Software Platform

Client's Requirements:

- A functional and innovative custom digital product tailored to the company's needs
- Swift development of the solution for achieving business goals and vision on time
- Highly-functional design and straightforward user interface
- Security and protection of sensitive company data

Our Solution:

The T4IT SW platform is a collection of frontend and backend components and modules that simplify the development and maintenance of digital products. Designing them with our SW platform cuts costs and reduces time-to-market, ensuring the highest quality and security for the entire system. At the outset of the project, we build upon platform foundations, saving up to 3 months of development time for our customers.

Key Benefits of the T4IT SW Platform:

- Speeds up the time-to-market
- Prevents a single-vendor lock-up form
- Cost-efficient maintenance
- Effective budget allocation on custom development
- Easy customization to fit specific needs
- Privacy protection and the highest level of data security
- Optimized for heavy usage with scalability and strong performance under high loads
- Easy integration with existing systems and workflows
- Smooth workflows with automated testing and CI/CD
- Versatile deployment options, supporting cloud, on-premises or serverless environments

5+ Years of successful platform experience

70+ Projects powered by the platform, delivering measurable business results

Touch4IT

Your One-Stop Shop for Product Design and Software Engineering

About Us

Touch4IT is a one-stop shop specializing in the design and development of digital products. We elevate our client businesses with our expertise in advanced technologies, including AR/VR, AI, BI, and customized software solutions.

Our Satisfied Clients:

FERRERO

& Others ...

Why Work with Us?

- We understand our clients' problems and design digital solutions to address their issues with innovative, tailored tech products.
- We provide end-to-end services, from product design to maintenance, using our own robust infrastructure.
- We provide our own infrastructure, "T4IT Private Cloud," giving you full control over your software and data.
- Our T4IT SW Platform accelerates project timelines, reduces costs, and optimizes workflows.
- Experience: Our proven experience, spin-off projects, and ISO-certified processes highlight our commitment to quality, security, and innovation.
